EXPERIENCE

Yaro

Front End Developer

Sep. 2018 - Present

- Built a fully functioning health care management app in React Native, working with client API data as well as local storage for user preferences, etc.
- Tracked down bugs and implemented user feedback.
- Deployed iOS builds for testing and release.

20spokes

Software Developer

Oct. 2017 - Sep. 2018

- Completed a three-month apprenticeship focused on learning best practices in software development while building apps in React, React Native, and Rails.
- Built web and mobile software products for various clients using Rails, React, React Native, Postgres, Heroku, CircleCI, and AWS.
- Maintained and debugged past projects in addition to developing greenfield apps.
- Heavy emphasis on cross-platform development and responsive design.

Dev Bootcamp

Teaching Assistant/Mentor

Aug - Oct. 2017

Helped students learn new programming concepts through the socratic method and pair programming.

Association of Legal Administrators

Copywriter/Editor

Feb. 2015 - May 2017

Wrote and designed HTML/CSS emails and email templates and produced microsites for association events in house CMS and style.

From publishing to marketing to web development, my career has been a journey of considering great ideas from authors, teams, and peers and helping them come to life. I'm motivated by inclusive, high-energy teams that foster curiosity and growth.
